SKIN CORRECTIVE FACE TREATMENTS BY SKINSTITUT

Skinstitut is an Australian made and owned high-performance cosmeceutical range. Providing targeted skin correction that works within the skin rather than just on the skin, past and present concerns are addressed whilst preserving skin integrity and function for the future. Skinstitut only uses active clinically proven ingredients to ensure maximum skin compatibility and long-lasting results.

Advanced Skin Analysis 20-30mins—\$45*

Accurate skin analysis is essential in determining external, internal and genetic factors that influence and have an effect on your skin. Each of these influences provide a different insight and plan to effectively target, treat and correct skin damage and breakdown. This thorough analysis explores solutions that go beyond just skin to incorporate lifestyle and environmental changes to provide a total healing and personal solution. *Fully redeemable on purchase of any Skinstitut product

HOT WAXING

We only use a warm organic bees wax, which is a gentler, more relaxing method of hair removal. Made from natural ingredients and containing real wax. It doesn't leave any sticky residue, irritation or reactions to the skin. Hot wax removes the hair from the root so your regrowth cycle is longer and the hair regrow is finer, softer and lighter.

THREADING

Threading is a less invasive method of hair removal, leaving the face clean and smooth. Using a cotton or nylon thread, this is twisted and rolled along the surface of the skin, removing the hair from the follicle. Unlike waxing, threading does not remove the fine layer of skin, leaving no trauma. Perfect for sensitive skin.
